e MeSH (Medical Subject Headings) est le thésaurus de référence dans le domaine biomédical. La NLM (U.S. National Library of Medicine), qui l'a construit et le met à jour chaque nnée, l'utilise pour indexer et permettre d'interroger ses bases de données, notamment MEDLINE/PubMed. L'Inserm, qui est le partenaire français de la NLM depuis 1969, a traduit le le SH en 1986, et met à jour la version française chaque année depuis lors. Dans le cadre d'un accord de coopération avec l'Inserm, l'Inist-CNRS (Institut de l'information scientifique et echnique du CNRS) contribue à la mise à jour de la version française depuis 2004. L'Inserm met la version bilingue à la disposition de la communauté francophone, qui peut la consulter ur ce site ou l'obtenir sous la forme d'un fichier sous format XML. La version bilingue est sou ases de données en français.
